

Friederich Galura

It is with great pleasure that we are able to bring to you a Chrome Cobalt Course presented by one of Dentaurem's most experienced Technical Instructors from Ispringen, Germany, Friederich Galura. Friederich graduated from 1975 to 1978 trained as a dental technician at The University Dental Hospital of Heidelberg, Germany. He has a wealth of knowledge and experience having worked in many Dental practices and Laboratories throughout Germany. Since 2002 he has been working for Dentaurem as a dental technician in the prosthetic department. Friederich Galura has lectured and conducted dental training courses extensively in Germany and worldwide. His articles have been published in dental magazines in Germany, France, Spain, Italy, Japan and in eLaborate Magazine in Australia.

Dentaurem Cast Partial Denture

Competence through experience

The successful system remanium® and rema®

The expansion values of our investment materials complement our remanium® alloys exactly. This also applies for important components such as the duplicating materials. A whole range of materials and machines completes this cast partial denture system.

Biocompatible dental restorations

Safety due to certified quality

Alloys, investment materials, waxes and duplicating materials are produced in-house at Dentaurem in Ispringen, under strict quality controls. The use of pure raw materials and the thorough examination of each and every batch guarantees the consistently high quality of our products.
